

DECEPTION STRIKE

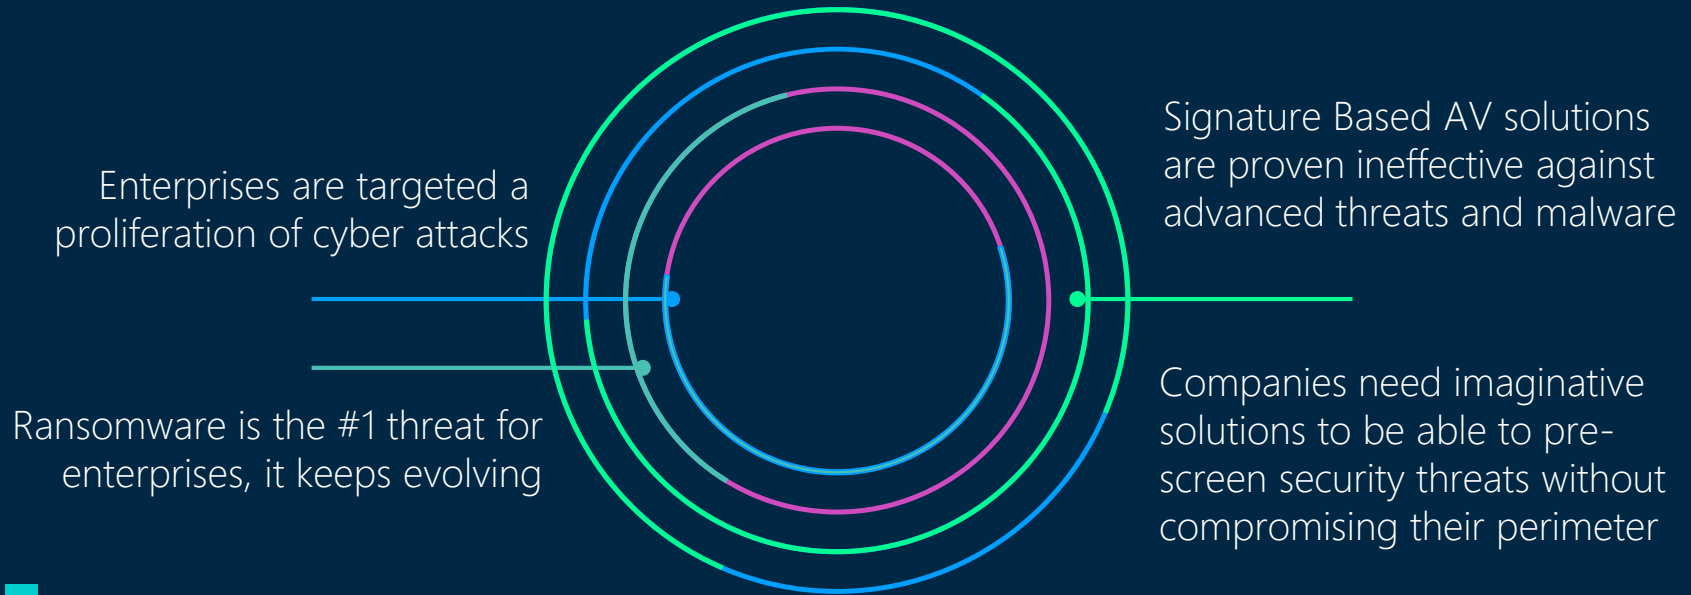

Threat Intelligence Platform

Inludens Adversariorum

Translates as 'tricking your opponents' from Latin

THE PROBLEM

The most important assets of the company are digital assets

OUR SOLUTION

Our solution leans on a simple fact:

“if you knew how you were going to be attacked, you’d be able to protect”

Our solution creates a completely external, isolated, controlled and safe sandbox environment resembling customer real life production systems.

We let hackers to enter/destroy/hack this mimicked environment so we learn from:

- What tools, what technics and what tactics they followed, in other words what do they do
- What modus operandi do they follow
- The level/complexity/maturity of threat or attack
- Where the cybercriminals are coming from
- What data or applications are they interested in
- How well your security measures are working to stop these cyberattacks

THE PRODUCT

- Real-Time & Trace Monitoring
- Real-Time AV Checks
- Malware / Exploit Retention
- Full attacker metadata
- File Integrity Monitoring
- Business Ad-Hoc Lures
- Tamper Resistance
- Post-mortem analysis:
- NFT and Block Chain based preservation
